Career Objective

Detail-oriented and analytical B.Tech student in Artificial Intelligence & Data Science with strong proficiency in Python, SQL, data analysis, and visualization. Seeking a Data Analyst role where I can apply my analytical thinking, problem-solving skills, and technical expertise to derive insights, support decision-making, and contribute to data-driven business strategies.

Education

B.Tech in Artificial Intelligence & Data Science
Rajiv Gandhi Institute of Technology, Mumbai University
Expected Graduation: 2027 | CGPA: 9.2/10

Skills

Technical Skills: Python, SQL, C, C++, Pandas, NumPy, Matplotlib, MySQL, SQLite, HTML, CSS, JavaScript, Flask

Tools: Jupyter Notebook, VS Code, GitHub, Weka, R Studio

Soft Skills: Leadership, Communication, Analytical Thinking, Team Collaboration

Projects

- Fake Content Detection Web Application (Python, Flask, HTML, CSS, JavaScript)

Developed a multi-feature web app detecting manipulated content using machine learning. Implemented modules for Fake Video Detection, Fake Image Detection, Fake Profile Detection, and Facial Analysis. Integrated Flask backend with responsive frontend for real-time content analysis.

- Inventory Management System (Python, Tkinter, SQLite, Matplotlib)

Built a full inventory system with CRUD operations and SQL database integration. Added sales visualization, CSV export, invoice generation, and stock alerts. Implemented role-based login and clean UI for usability.

- Weather Forecasting Web App (HTML, CSS, JavaScript, OpenWeather API)

Created real-time weather dashboard showing temperature, humidity, and wind speed. Used external APIs for accurate and dynamic weather data.

Leadership & Extracurricular Activities

Core Member – E-Cell, Rajiv Gandhi Institute of Technology

- Publicity Manager: Led event publicity and student engagement.
- Corporate Relations Secretary: Coordinated with industry experts for guest sessions.
- Contributed to event planning, outreach, and collaboration activities.
